

One LinGo

These days, we work anywhere and everywhere we can. People are constantly on the move while doing their jobs, but we think being out and about shouldn't limit anyone's communicating to the best of their ability. That's why we created One LinGo—our mobile and browser-based app for providing on-the-go support, helping people with their business communication wherever they are.

What is One LinGo?

- A mobile and browser-based platform for relevant business communication support
- An instant translation tool
- An exhaustive vocabulary resource
- A comprehensive collection of business email templates
- A guidance tool for better pronunciation of key business terms and relevant words

The benefits

Mobility: Users can now get business communication support wherever they are: at home, at work or on the move

Immediacy: Presents solutions instantly, helping learners to work faster and be more productive

Personalization: Users can compile lists of new words from anywhere on the Web for future reference and pronunciation practice

Relevance: One LinGo has the ability to share the culturally relevant words, phrases and terminology of a specific company, ensuring greater fluency of staff

How it works

Tools for increasing fluency

One LinGo provides learners with easy access to the definitions, pronunciations and usages for both industry-specific and company-specific words. Going even further, learners can select words and phrases from the Web to be defined and stored for everyday use on the job. When brought together, these points of reference help learners to communicate more effectively with each other and the rest of their industry.

Always connected

Having a mobile-enabled platform means learners can get the communication support they need wherever they are and whenever they want it. Online or offline, One LinGo provides access to best-in-class reference tools, translation services and templates, increasing productivity no matter where an individual may be.

Practice makes perfect

Pronunciation no longer needs to be a problem. With the 'hear it, speak it' feature, One LinGo allows learners to hear specific words and phrases spoken in a variety of accents and speeds, creating greater understanding for both speaker and listener.

World-class content that's just one click away

When using One LinGo within a browser, learners are always only one click away from the award-winning business content available on the 'One' platform.
